

# BISHAW KIRTI CHAKMA

East Kazipara, Mirpur, Dhaka

☎ +880 1874-792681 | ✉ ku.et.bishaw@gmail.com | 🔗 LinkedIn | 🌐 bishawchak.github.io

## RESEARCH INTERESTS

---

Machine Learning, Natural Language Processing, Artificial Intelligence, Generative AI

## EDUCATION

---

### Khulna University Of Engineering & Technology

Khulna, Bangladesh

B.Sc. in Electronics and Communication Engineering

CGPA: 3.40 / 4.00

- Relevant Coursework: Computer Fundamentals and Programming, OOP Concepts, Data Structures and Algorithms, Internet Programming, Database System, Computer Networks, Image Processing, Machine Learning

## RESEARCH EXPERIENCE

---

### Publication:

- **PriBan: A Benchmark Dataset and Modeling Framework for Privacy Preservation in Bengali Texts** [Currently under review at ICCIT 2025]
- Authors: Md Anowarul Faruk Shishir, Bishaw Kirti Chakma, Indrajit Gupta
- Description: It aims to preserve user privacy during interactions with large language models, which have a tendency to inadvertently leak sensitive information. Our current focus is on the Bangla language.

### Undergraduate Thesis:

- **Detection of LLM (Large Language Model) Generated Text Using Long Short Term Memory**
- Description: This study proposes an LSTM-based approach by combining linguistic and contextual analysis to distinguish human-written from machine-generated content. Compared to CNN and DistilBERT models, the proposed system achieved 98% accuracy. The model also improved sensitivity while requiring less training time and minimizing computational power and resource usage.

## PROJECT WORK

---

### Student Attendance System | ASP.NET, C#, HTML, CSS, Bootstrap

- Developed a web-based attendance system using ASP.NET and C#, enabling teachers to record student attendance efficiently. Integrated user authentication, role-based access control, and database connectivity with MS SQL Server for secure data management.

### Two Wheels Self Balancing Robot | Arduino, Gyro Sensor, Motor Driver, Bluetooth Module

- Designed and implemented a self-balancing robot following the inverted pendulum principle using Arduino Nano and MPU6050 sensor. Integrated a PID-based feedback control system to maintain stability and developed wireless control through the EZ-GUI Ground Station mobile interface.

### Ping Pong Game | Raylib, C++, OOP

- Built a classic Ping Pong game in C++ using the Raylib library, leveraging OOP principles such as classes, objects, and inheritance to enhance code efficiency, along with collision detection and AI for CPU paddle gameplay.

### Sorting Algorithm Visualization | Raylib, C++

- Implemented visualization of popular Sorting Algorithms like Bubble, Insertion, Selection, Merge and Quicksort.

### DC Power Supply | Transformer, Full Wave Bridge Rectifier, Capacitor, Voltage Regulator

- A voltage supplier that provides 0-30v with over voltage, under voltage, short circuit protection capabilities that helped to get introduced with different electronics components and PCB design.

## TEST SCORES

---

### TOEFL(XX)

2025

- R-25, L-23, S-23, W-26

## SKILLS

---

**Programming:** C, C++, Python, SQL, MATLAB

**Editor/IDE:** Google Colab, Jupyter Notebook, Code::Blocks, Visual Studio, PyCharm

**Web & Frameworks:** HTML, CSS, Bootstrap, ASP.NET

**Data & ML Tools:** NumPy, Pandas, Scikit-learn, Keras, Matplotlib, Seaborn

**Networking:** Cisco Packet Tracer

**Other Tools:** Git, Microsoft Office, Canva

## AWARDS AND CERTIFICATES

---

### University Technical Scholarship (2020-2024)

- 3 times for ranking in the top half of the class.

### Bangladesh Police Academic Excellence Award (2018)

- Awarded by Dr. Mohammad Javed Patwary, former IGP (Inspector General of Police), for outstanding HSC exam results.

**SQL Essential Training** - LinkedIn

**Machine Learning and Deep Learning Specialization** - Coursera
